AUTHOR Morris, June E.; Nolan, Carson Y.
TITLE Bibliography of Research on the Visually Handicapped. 1953-1971.
INSTITUTION American Printing House for the Blind, Louisville, Ky. Dept. of Educational Research.
PUB DATE 72
NOTE 109p.

EDRS PRICE MF-$0.65 HC-$6.58
DESCRIPTORS *Bibliographies; *Exceptional Child Research; *Research Projects; *Statistical Data; *Visually Handicapped

ABSTRACT

The bibliography of research on the visually handicapped covers approximately 1,300 entries published between the years 1953 and 1971, inclusive. Only those references containing reports of research on the visually handicapped in which empirical data of some kind were collected are included. Studies of single cases are included, with most studies focusing on legally blind subjects. Excluded is medical research on the eye blindness. The bibliography is meant to supplement and update Books about the Blind, published in 1953 by the American Foundation for the Blind and compiled by Helga Lende. Sources said to have been searched systematically from January 1953 through December 1971 include Psychological Abstracts, Dissertation Abstracts and Dissertation Abstracts International, Exceptional Children, New Outlook for the Blind, International Journal for the Education of the Blind, and Education of the Visually Handicapped. Entries include journal articles, bulletins, theses, books, some foreign publications, US government publications, manuals, and other publications. Generally provided in each entry are author, title, publication date, place of publication, and page numbers. (CB)

Foreword

This bibliography contains only references to reports of research on the visually handicapped in which empirical data of some kind were collected. Studies of single cases are included. Most studies focus on legally blind subjects. Medical research on the eye and blindness has been excluded.

The purpose of compiling this bibliography was to supplement and update the general bibliography compiled by Helga Lende and published as Books about the Blind in 1953 by the American Foundation for the Blind. While many sources have contributed references to this bibliography, only those listed below have been searched systematically from January 1953 through December 1971.

Psychological Abstracts

Dissertation Abstracts and Dissertation Abstracts International

Exceptional Children

New Outlook for the Blind

International Journal for the Education of the Blind

Education of the Visually Handicapped

The format for the references reported here is that specified in the Publication Manual of the American Psychological Association, 1967 Revision, with the following exceptions: Book titles and journal names are printed in capitals rather than being italicized and, in some cases, parentheses have been substituted for brackets. Additionally, accent marks have been omitted from foreign language listings.
